

AUTOMATION MODULES FOR FLEXIBILITY IN THE LAB

JAZZ 400R TUBE LABELING AND RACKING SYSTEM

Laboratory automation efforts shouldn't be piece-meal. True integration requires that each module works seamlessly with the next. The Jazz 400R is a highly flexible system that accomplishes several otherwise tedious and time-consuming tasks:

- › Automatically orients bulk-fed tubes and vials and places them all in exactly the same position
- › Prints and applies a sequentially-numbered linear or 2D barcode symbol to each tube or vial (PR100i printer-applicator);
- › Robotically loads tubes or vials into racks or trays (Jazz 400R).

WHILE EACH MODULE IS AVAILABLE SEPARATELY, THEY ALL WORK TOGETHER IN A SYMPHONY OF INTEGRATION THAT IMPROVES PRODUCTIVITY, REDUCES REPETITIVE-STRESS CONCERNS, AND ENSURES ABSOLUTELY UNIQUE IDENTIFICATION OF ALL CRITICAL SAMPLE CONTAINERS.

Other features include:

- › Up to 2 hours autonomous operation
- › Easy changeover to run various tube and vial sizes and types
- › High-resolution printing (600 dpi) and precision label placement (± 0.35 mm)
- › Customizable to accommodate unique operational sequences and integration with downstream automation

YOUR NEEDS, OUR EXPERTISE.

Come to us with your laboratory automation and sample identification requirements. We will create a solution that not only meets your needs but will exceed your expectations.

LOOK TO US FOR ALL YOUR CRITICAL LABELING SOLUTIONS.

We work closely with you to provide the right labels to meet all your requirements. And not just the right labels, but everything for your labeling needs. From labels to printers, and scanners to label replication systems, Computype offers this and everything in between.

WE'D LOVE TO HEAR FROM YOU.
