

Clinical Trial Labels

Pre-printed label sets and forms to accommodate your sampling systems

Tailored to your specific needs

From data to materials we'll work with you to ensure your needs and expectations are being met. Your pre-printed sets will arrive prepared to meet your specifications:

- ▶ Representative colors and icons
- ▶ Prefixing and suffixing
- ▶ Variable messaging to accommodate varying collection times and sample cycles
- ▶ Custom sorting and packaging

Expertly matched print technology

One of the strongest features of digital offset printing is its ability to provide rich, vivid and accurately matched colors.

In addition, it can accommodate variable data on large jobs at high speed—talk about a great match for clinical trial labels!

Our digital printing press and our team of printing experts are top-notch and prepared to accommodate your needs.

No duplicate labels

Attached to our digital printing press is our state of the art vision system. Our vision based sequence management system scans each and every barcode to ensure no duplicate or defective barcodes reach your facility.
