

# THE LATEST INNOVATION FROM THE LARGEST DIN SUPPLIER IN THE WORLD.

## VISION SYSTEM

EVERY barcode symbol on EVERY label set you purchase from Computype will arrive at your facility having already been successfully scanned and accurately decoded thanks to a new installed and validated vision-based inspection system that was previously not technically feasible.

We're excited to announce this enhancement to our production process that will further confirm our leadership position, and may *reduce the expense* you incur with the incoming inspection of our sequentially-numbered DIN label sets. The new inspection system scans and decodes every barcode symbol on every label set, and **automatically compares the decoded message to your job's master file**, which allows us to verify that:

- > Each decoded number is within the range of numbers requested and is not duplicated;
- > All the symbols are in the correct position on the web;
- > The symbols are scannable and decode accurately;
- > There is no gap in the sequence.

And all this is done at production speeds of around 75 feet per minute.

### ANOTHER MILESTONE FOR ON OUR TRACK RECORD.

Computype has been the leader in the production of Donation Identification Number (DIN) label sets in North America since the mid-1970s when we helped develop the first Codabar standards. Since then, we've led the way with outstanding product quality, time-tested sequence integrity, multiple piggyback adhesive options, and local sales support. The result is that *more than 90% of blood collected in North America contains a DIN produced by Computype.*

### SAVES LIVES, SAVES TIME, SAVES MONEY.

In preview announcements to several blood banks, this new capability was greeted enthusiastically—many clients anticipate significant cost savings because of the reduction in expenses associated with their own incoming inspection programs.

### WE'D LOVE TO HEAR FROM YOU, AND TELL YOU MORE.

Come and visit us here in St. Paul, Minnesota if you're interested in seeing our new inspection system in action. And please feel free to contact us directly, or your Regional Sales Manager, if you have questions about this or any part of our DIN label set production process.
