

QUESTIONS TO ASK BEFORE YOU CHANGE YOUR MICROWELL PLATE LABELING STRATEGY

Ask your team the following questions to determine which plate labeling strategy best suits your needs, challenges and budget.

What Do Your Processes Look Like Now?

- How many sides of the plate do you need to label?
- How many plates do you need to label per day?
- Do you require variable information be printed on-demand?
- Will your labeler need to tie into external automation processes?
- Will your plates be exposed to harsh conditions/substances?

What Challenges is Your Lab Facing?

- Are there areas in the lab where more employees would be valuable?
- Is your lab struggling to reach throughput volume goals?
- Is throughput speed and efficiency lacking?
- Are sample plates being lost to mislabeling?
- Is poor label application causing interruptions to downstream automation?

What is Your Lab Currently Spending?

- What is your lab spending on consumables each month?
- How many employees do you have performing labeling related tasks?
- How many hours do those employees spend labeling each week?
- How much are they being paid per hour to apply labels?
